

LibreOffice (/ˈliːbrə/)[11] is a free and open-source office productivity software suite, a project of The Document Foundation (TDF). It was forked in 2010 from OpenOffice.org, an open-sourced version of the earlier StarOffice. It consists of programs for word processing; creating and editing spreadsheets, slideshows, diagrams, and drawings; working with databases; and composing mathematical formulae. It is available in 120 languages.[9] TDF does not provide support for LibreOffice, but enterprise-focused editions are available from companies in the ecosystem.[12] ▲

This text was taken from Wikipedia, a free content encyclopedia written and maintained by a community of volunteers, known as Wikipedians, through open collaboration and the wiki software MediaWiki. Wikipedia is the most-read reference work in history,[3][4] and is ranked among the ten most visited websites; as of 2023, it was ranked fourth by Semrush,[5] and seventh by Similarweb.[6] Founded by Jimmy Wales and Larry Sanger on January 15, 2001, Wikipedia has been hosted since 2003 by the Wikimedia Foundation, an American nonprofit organization funded mainly by donations from readers.[7]
