

I can not figure out why LibreOffice uses Bulgarian language settings when I edit this file. My locale is en_US.UTF-8 and all Language settings within LO (that I can find) specify English.

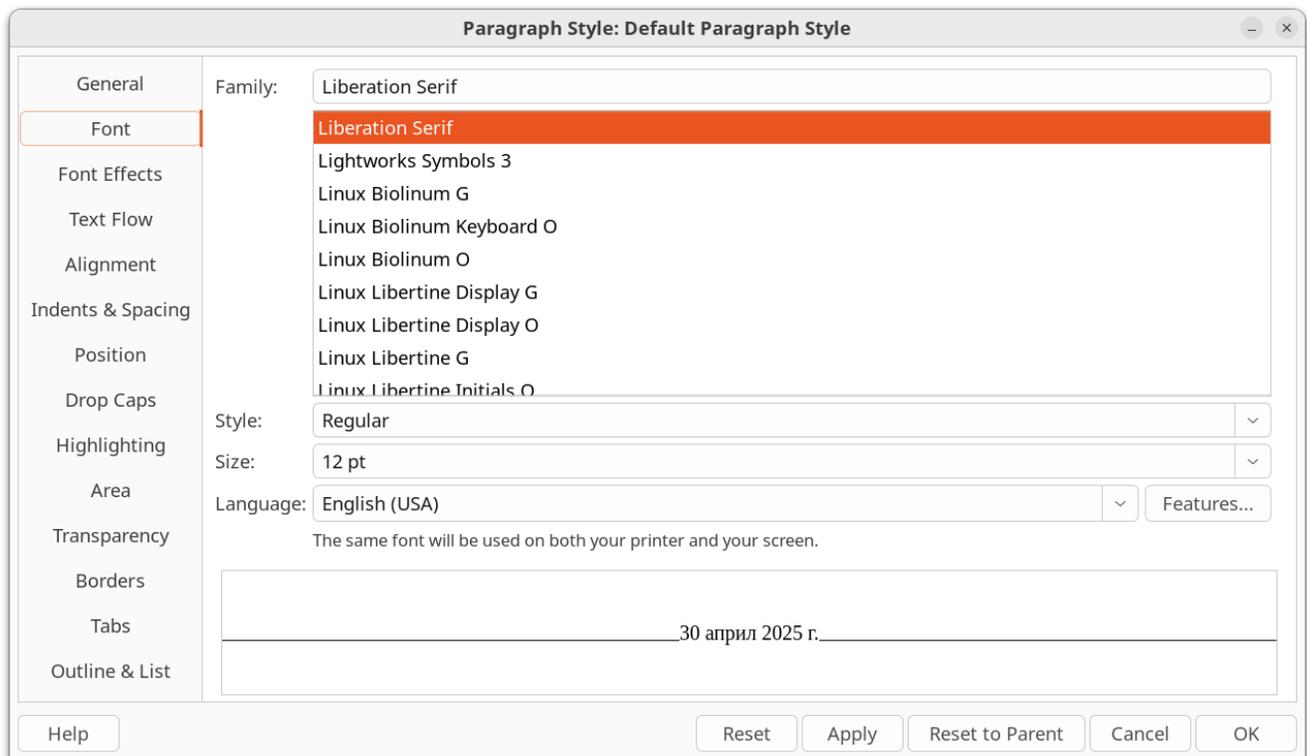

This file is mainly in English but also contains some Cyrillic (Bulgarian) text: Лено Ленче
Following is a Field (Date fixed) which I want to display using a normal US-English style, specifically MM/YY/DDDD:

30 април 2025 г.

... but the Language drop-down for the Date field only offers Bulgarian-style options!
When printed, the above Date field appears like this (from screenshot of print-preview):

30 април 2025 г.

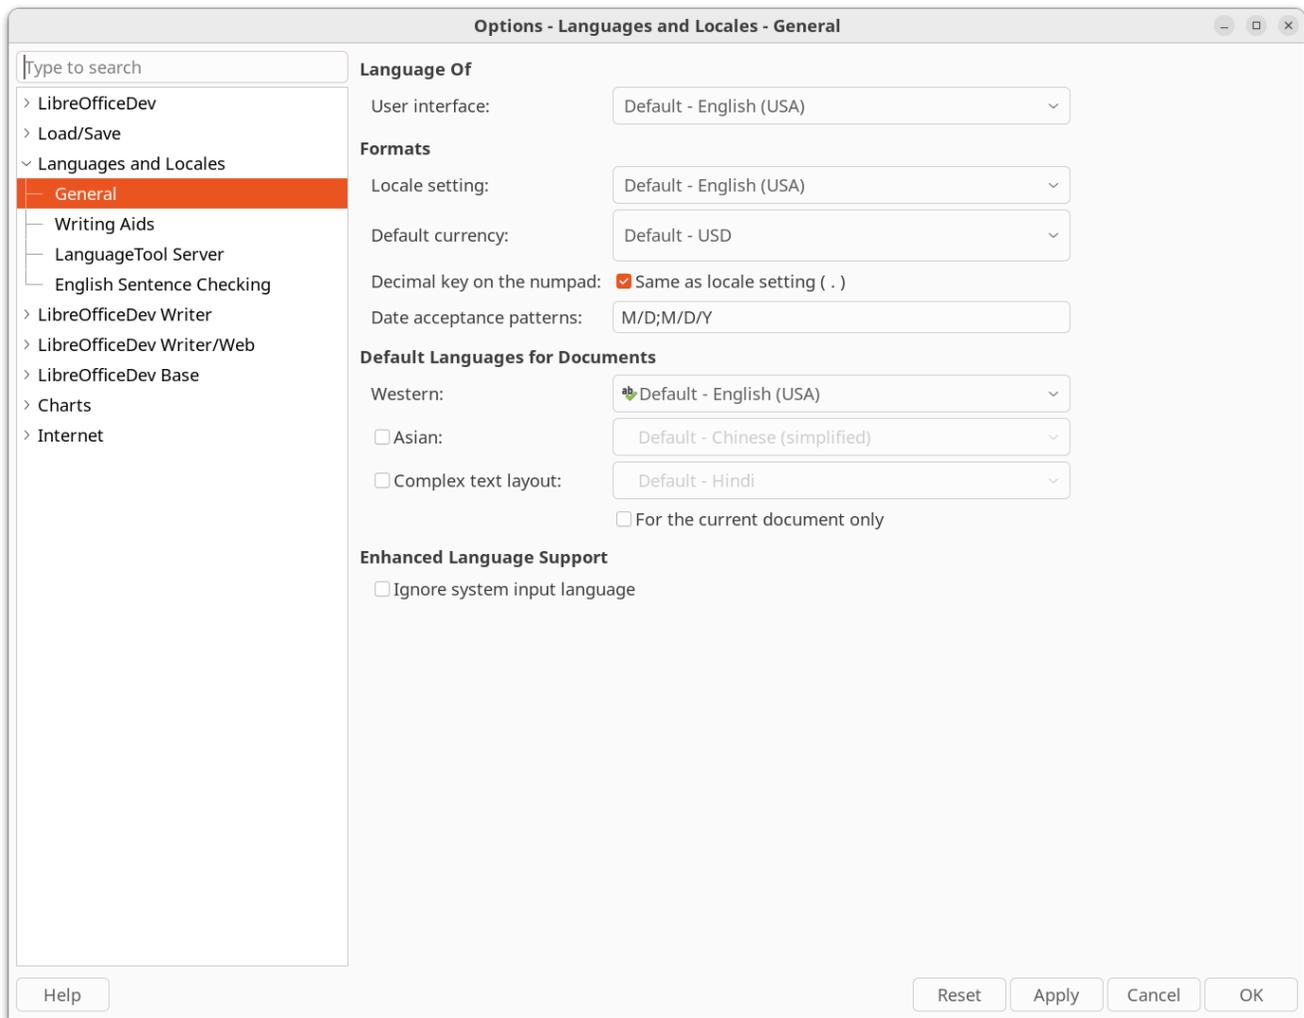

The Paragraph Style of the para containing the Date field has language set to English. Here is a screenshot:

Notice how the text displayed in the Para Style, which comes from the Field, is in Bulgarian not English, even though the „Language“ in the Para Style is English.

Also, my keyboard seems to be *stuck in a non-standard layout* where the single-quote key inputs a double-angle quote («). This does not occur in other windows, so something is telling LO to do this. What causes this?

Tools->Options->Languages and Locales->General has *every* option set to „English“. Screenshot here:

And here is the output from the „locale“ command, run on the terminal where I started soffice:

```
$ locale
LANG=en_US.UTF-8
LANGUAGE=
LC_CTYPE="en_US.UTF-8"
LC_NUMERIC="en_US.UTF-8"
LC_TIME="en_US.UTF-8"
LC_COLLATE=C
LC_MONETARY="en_US.UTF-8"
LC_MESSAGES="en_US.UTF-8"
LC_PAPER="en_US.UTF-8"
LC_NAME="en_US.UTF-8"
LC_ADDRESS="en_US.UTF-8"
LC_TELEPHONE="en_US.UTF-8"
LC_MEASUREMENT="en_US.UTF-8"
LC_IDENTIFICATION="en_US.UTF-8"
LC_ALL=
```
