Bug 168237

Monday, 1.09.2025

https://bugs.documentfoundation.org/show_bug.cgi?id=168237

Bug 168237 - GDI EMF OOXML: 'Wall Chart' resizes after reopen DOCX saved in LO with chart pasted to Writer form Excel (edit)
 **Reported:** 2025-09-01 16:47 UTC by Piotr Osada

Behavior observed during further investigation of a previously reported bug ticket:

Bug 163158 - [SVM to EMF export] Writer can't save 'Chart Wall'-background (in plot area) in DOCX when pasted as GDI from Calc (edit)
  Reported: 2024-09-25 19:39 UTC by Piotr Osada
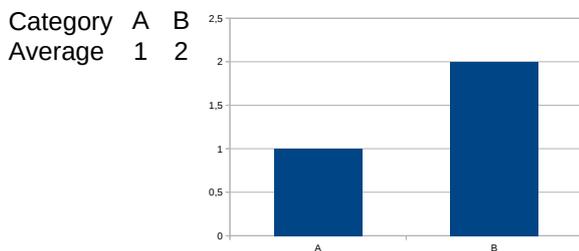

Steps:
1) In MS Excel copy any chart
2) In LO Writer: Ctrl+Shift+V
3) Paste special → Graphics Device Interface metafile (GDI)
4) Save as DOCX
5) Reopen DOCX in Writer or Word

Result:
The 'Chart Wall' (plot region) shows a small part (aproximately 20% x 20%) of the original chart, stretched across the entire wall starting from the top-left corner.
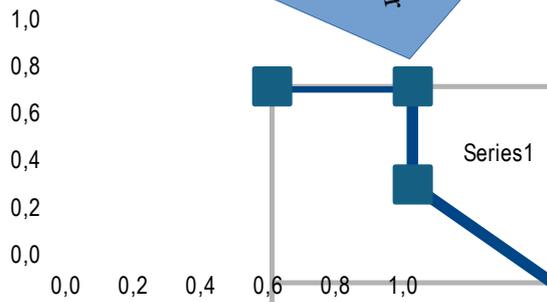

Expected:
A chart inserted in document as a vector graphic (using GDI interface) should retain the same proportions as it appears in spreadsheet applications.

Version: 25.8.1.1 (X86_64)
Build ID: 54047653041915e595ad4e45cccea684809c77b5
CPU threads: 16; OS: Windows 11 X86_64 (build 26100); UI render: Skia/Raster; VCL: win
Locale: pl-PL (pl_PL); UI: en-US
Calc: CL threaded
Microsoft® Word for Microsoft 365 MSO (Version 2507 Build 16.0.19029.20136) 64-bit

EMFParser can be downloaded from here:
