# CHANGE COLOURS WITH THEMES

First Heading

The first thing I did was to create a new document. Then I defined the colours in the style sheets. For this I chose colours from the colour palette „Theme colours".

Screenshot 2: changing style sheet

Screenshot 1: Colours from "Theme Colours"

It is then possible to change the colours by changing the theme.

https://help.libreoffice.org/latest/en-US/text/shared/guide/usingthemes.html

So far, all colours have also been changed.

Screenshot 4: Theme "libre office"

After saving the document, closing it and then reopening it, it looks like this after a topic switch:

Heading

   Lollipop cheesecake chocolate cake pie jujubes. Bonbon wafer candy canes apple pie oat cake liquorice ice cream. Cupcake sweet roll icing cheesecake pudding. Cake pie gingerbread carrot cake topping oat cake cake. Dragée jelly-o lollipop soufflé tart chocolate marshmallow biscuit icing. Cake cupcake chocolate bar toffee marzipan muffin cake caramels. Screenshot 5: only font colours changed, e.g. lines remain in the previous colour

This is also the case if the document was created as a style sheet. This is then used as a template or the styles are loaded into the templates.

After this has been loaded, it is not possible to change all colours with a theme change.

Screenshot 6: colour name is still correct, but the colour value is incorrect.
